Our mission

Packaged water has created a very real problem. We're here to solve it.

Water is the lifeblood of our planet.

We believe it shouldn't be bottled, plasticised and labeled. It shouldn't be shipped around. It shouldn't go from here to there and there to here. It shouldn't be imported, exported, taxed. It shouldn't be marketed. It shouldn't be sold. It shouldn't cost you, or us.

But it does.

Water is being trashed to the point that we can't do the one thing we're meant to do with it: Drink it, from the tap.

Buy 1 = Save 104.

By using 1 Dopple bottle, you're saving 104 single-use packaged water bottles. Every. Single. Year. Epic, right?

Drink it, from the tap.

Our standards

Ending packaged water. **Sustainably.**

We're here to solve a problem. But not at the costs of creating another. Here's how we work to have a net positive effect on the planet by raising our sustainability standards.

Cradle to Cradle Certified®

We certify products according to the Cradle to Cradle Certified® program. This means that we follow the strictest sustainability requirements according to the world's most advanced science-based measures.

Designed to last

Our design makes it easy to clean the product, and easy to replace broken or lost parts. This extends the lifetime of our products.

1% for the Planet

We've joined 1% for the Planet. A coalition of businesses who donate 1% of all sales, not just profits, to support verified environmental causes and organisations.

Certified B Corporation

As a Certified B Corporation we follow social, environmental and governance best practices. We're currently in the top 10% of all B Corporations overall and in the top 5% of companies in the Environment score.
